

ABOUT US

The SOGLASS Mission

About Suriname Oil & Gas Logistics and Sustainable Support

Since its inception, the company mission has always been “to deliver accurate, feasible, and adequate supply solutions for the challenges faced by the client organization, while maintaining environmental and community standards”.

At SOGLASS, we yield solutions that are unique and thoughtful. Rather than relying on run-of-the-mill generic ideas, we study and analyze each client’s requirements thoroughly. We look out for avenues to minimize logistical challenges or issues related to project assistance and coordination faced by the Oil and Gas sector newcomers in Suriname. Our dedicated approach in removing any supply chain or related service concerns allows the client organizations to focus their entire resources on other aspects of their core business.

Yes, there are multiple variables- scalability, shipment size, operation, safety. However, with experienced teams consisting of members from different areas of expertise, our management system has been successfully able to deliver with assured consistency throughout the Oil & Gas sector in Suriname. A vast work network also enables us to guarantee swift and flexible logistical solutions.

Our Vision

“Perfection is achieved, not when there is nothing more to add, but when there is nothing left to take away”. – Antoine de Saint-Exupery, Airman’s Odyssey.

SOGLASS envisions to be the best one-stop logistics and related service provider in the Oil & Gas industry sector. With an all-inclusive Single Point of Contact management model, we have already positioned ourselves as the ideal choice for supply chain management among our clients in Suriname’s Oil and Gas domain. We are looking to further expand our horizons over the upcoming years.
